## Skills

React.js

HTML5

CSS3

Sass

JavaScript

TypeScript

Python

Adaptability

## Languages

Spanish (Native)

English (B2)

Self-leaner Front-end developer, passionate for pixel perfect designs, like to build web sites but the most I like is to build solutions and solve problems. Always a team-player, empathic and good listener. Other things I like are sports, volleyball and football overall, love to listen music especially rock, my favorite group is Metallica.

## Personal Projects

### Portfolio

*HTML, CSS, JavaScript, Sass, Gsap*
Personal web page made in HTML, CSS preprocessor Sass, and javaScript. The animations were made with the JavaScript library Gsap.

### Volleyball-App

*HTML, CSS, JavaScript*
Volleyball board for teaching volleyball systems. The teacher can drag and drop "players" in the court for explain the students where their position is.

### Weather-app

*React.js, Material-ui, Testing Library, Storybook*
Weather app where you can check the weather in any city in the world using the open weather map API. Making this app it was necessary to use different hooks, and Testing Library provided by React.js. Storybook was used for a pre-render of the React components.

## Education

2018-02 - Current

### Mechanical Engineering

*Universidad Nacional De Colombia - Bogotá*
